Bring
Your
Codebook!

C&M Enterprises will be providing training on Motors, Conductors, & Protection under the 2017 NEC

Motors, Conductors, & Protection to the 2017 NEC®

This in-depth code based instruction provides specific user information for the general application of motors, motor conductors, and motor protection. Specific sizing and protection requirements of various motor circuit componentry, which is found in the typical motor circuit, is outlined in a detailed step process revealing both the calculation requirements and governing code sections related to motor circuit componentry sizing and based upon the requirements of the 2017 NEC®. Attendees will benefit by bringing and utilizing their personal NEC® codebooks as training day coursework material. The training PowerPoint guided instruction is designed to provide all the necessary information to explain, comprehend and determine various motor circuit componentry ratings. This course is especially suited for master and journeyman electricians, design professionals and others with a need-to-know regarding some the basic motor circuit selection and calculation processes required for NEC® compliance.

This course qualifies for 8 contact hours of Code based continuing education for Kansas electricians for more information see: CandMenterprises.net
